How to Remove Boat Shrink Wrap and Prevent Contamination

When removing shrink wrap for recycling, make sure to remove all vents, zippers and other non-shrink wrap material. Any non-shrink wrap material is considered contamination, including the plastic straps that cinch the wrap to the belly of the boat.

The best way to remove shrink wrap is to cut the wrap above the strap at the belly of the boat, so the strap falls away, leaving only shrink wrap.

Once all non-shrink wrap has been removed, the wrap should be bundled and tied with a strip of shrink wrap.

1) Fold the film into a width of 4-5 feet, roll the film up and then cut off a strip of film from the end of the roll...

(2) and use the strip of film to tie the bundle.

This program is a collaboration between Woods Hole Sea Grant, WHOI, Cape Cod Cooperative Extension of Barnstable County, and the towns of Bourne, Chatham, Dennis, Eastham, and Wellfleet.
